- **Facing Challenges**: Facing challenges and the realities of the current economic situation; won’t be purchasing big ticket or household items due to poor consumer confidence; their financial situations are worse than they were 12 months ago; they are not hopeful about their personal financial futures or that of the US economy.
- **Financial Nesters**: Trying to maintain lifestyle with a “business as usual” outlook but haven’t lost sight of the changes taking place in the US economy; do not expect the economy or their personal financial situation to improve anytime soon, but continue to make purchases.
- **Economically Indifferent**: Out of the mainstream; indifferent to the economic downturn; don’t have a sense that the economy is slowing down or getting better; modest financial situation is not a result of the current economy.
- **Fiscally Fit**: More flexible and adaptive to changes in the market; optimistic, feel financially secure and well positioned during the current downturn; keep spending under control with few big- or even medium-ticket items planned in the near future.
- **Confident Spenders**: Largely untouched by the current economy and continue their regular spending or even increase their spend; confident about their current economic condition, financially secure and even willing to take investment risks.
Segmentation (Bar Chart)
(No Base, Population Weighted)

**Bar Chart Index:** The likelihood of the target to fall into the specific segment

Adults who bought a state lotto ticket in the last 12 months are 9% more likely to be part of the Financial Nester segment, than all adults

Adults who bought a state lotto ticket in the last 12 months are 6% less likely to be part of the Economically Indifferent segment, than all adults
